SUMMARY

Software Engineer with nearly two years of experience developing backend systems, REST APIs, cloud-based applications, and AI-driven solutions using Python, .NET, FastAPI, Flask, SQL, and Google Cloud Platform (GCP). Experienced in machine learning, data engineering, and LLM-based applications, with hands-on experience in LangChain, retrieval-augmented generation (RAG), vector databases, feature engineering, model evaluation, and predictive modeling.

SKILLS

Programming Languages: Python, C#, SQL, JavaScript, TypeScript, C++

AI & Machine Learning: Scikit-learn, Pandas, NumPy, LangChain, ChromaDB, Sentence Transformers, LLaMA, Prompt Engineering, RAG, Feature Engineering, Hyperparameter Tuning, Model Evaluation

Backend Development: ASP.NET MVC, .NET Framework, FastAPI, Flask, REST APIs, Entity Framework, JWT, Swagger

Frontend & Mobile Development: React.js, Flutter, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, SQL Server, MySQL, Supabase, SQLite

Cloud & Data Engineering: Google Cloud Platform (BigQuery, BigQuery ML, Dataflow, Cloud Storage), ETL Pipelines

DevOps & Development Tools: Docker, Git, GitHub, GitHub Actions, Postman, CI/CD

Software Engineering Practices: Agile Development, SDLC

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Mavericks United — Lahore, Pakistan

July 2025 – Jan 2026

- Developed a cross-platform mobile application using Flutter, and implemented authentication, state management, and responsive UI
- Developed FastAPI middleware to connect backend systems with other applications, handling requests and data exchange between them
- Implemented frontend features in React.js for a retail agent-facing application and containerized applications using Docker for production deployment

Associate Software Engineer

IncaNet IT Alliance — Lahore, Pakistan

May 2024 – June 2025

- Designed relational database schemas and wrote SQL queries to support CRUD operations across enterprise applications, and built REST APIs to connect frontend and backend systems
- Developed backend features using the .NET MVC framework for business-critical application modules
- Developed a Point-of-Sale system handling inventory tracking, receipt and invoice generation, and sales reporting
- Developed a Student Management System with separate Admin and Student portals supporting registration, bulk Excel imports, attendance tracking, examination management, and automated fee processing

AI PROJECTS

AI Growth Journal | LLM-Based Personal Assistant

- Developed an AI-powered journaling application featuring semantic search, sentiment analysis, personalized reflections, and goal tracking
- Implemented a retrieval-augmented generation (RAG) pipeline using LLMs, vector embeddings, and semantic search to provide context-aware responses

MACHINE LEARNING & DATA PROJECTS

Bank Marketing Term Deposit Prediction

- Performed feature engineering and trained five classification models on a dataset containing approximately 45,000 records
- Optimized the best-performing model through hyperparameter tuning and achieved approximately 90% accuracy

Chicago Taxi Analytics & ML with BigQuery ML

- Developed regression, classification, and forecasting models using BigQuery ML and SQL
- Evaluated model performance using MAE, MSE, RMSE, and R^2 metrics

EDUCATION

Bachelor of Science in Computer Science

The University of Lahore

June 2026

CGPA 3.74

CERTIFICATIONS

- AI and Data Science for Beginners — Honhaar Jawan Program
- AI for Beginners — HP LIFE
- Advanced SQL — Kaggle
